

Robot Name: _____

Students: _____

Components	1-Not yet Competent	2- Competent	3- Sophisticated
Robot Design Architecture Project Planning Outcomes 2-3 slides	▪ System architecture presented in a vague manner, difficult to understand elements. ▪ Little planning or reflection on performance of team or design. ▪ Minimal links to req. or outcomes.	▪ System architecture presented in sufficient detail enabling understanding of the design. ▪ Project planning/timeline presented clearly & reflection on experience. ▪ Satisfactory linkages to requirements.	▪ System architecture presented in a way to reveal significant design thought. ▪ Plan execution evaluated with metrics; logical discussion on deviations. ▪ Successful attainment of requirements.
	0 – 6 points	7 – 11 points	12 – 15 points
Contributions Design V & V, data Critical Thinking 6 slides	▪ Little awareness of compartmentalization, boundaries of contribution to system ▪ Minimal design presented ▪ Few data, vague V&V, insufficient evaluation and/or analysis	▪ Awareness of contribution to overall system ▪ Satisfactory proportion of design to team effort with reasonable anticipated outcome ▪ Sufficient data and analysis to underpin aims and demonstrate achieved contribution	▪ Clear awareness of contribution and relevance to client requirements/system ▪ Equal or excess proportion of final design evident, with reliable outcome ▪ Data, V&V framework, rationale
	0 – 34 points	35 – 59 points	60 – 75 points
Communication (throughout) and Closing 1 slide	▪ Slides too rudimentary for audience. ▪ Presenters not audible, do not pace presentation in compressible fashion, and/or rely too heavily on slides. ▪ Presenters largely looking at slides, monotonic, and/or convey closed body language. ▪ Non-professional conduct.	▪ Level of presentation appropriate for audience. ▪ Presenters are organized, have notable flow and execute transitions satisfactorily. Focus has occasional disconnects between slides and presenter. ▪ Presenters maintain eye contact for the most part and convey open/polite body language.	▪ Presentation delivers a clear message, leaving little room for ambiguity. ▪ Presenters are the focus, clear flow, slides and transitions are effective at supporting the message. Talk has a smooth take-off (beginning) and smooth landing (end). ▪ Presenters have audience <i>engaged</i> and handle comments/questions well.
